Good day, all. Please be advised that I have postponed the hazmat entry for confined space cleanup of the location at 8511 Olive Street until after the grate has been fabricated to prevent their return. Our Caltrans forces can continue to clean up the outside area of the non-hazardous trash and debris but do not enter inside the drainage structure without proper ventilation and continuous air monitoring.

Frank and Robin, please continue to have your crews to keep on top of this trouble spot, and keep me updated as to when the grate is ready to install. I will need at least 1 week's advanced notice to gather a Hazmat entry team when we are ready to go back inside.

Thanks.

Subject: continuing ongoing problem with homeless causing fires and damage to State property 110 freeway @ Manchester area

Good Afternoon,

Today I met with CalTrans as they surveyed the area of Olive and 84th Place for clean-up. We have a firm date of January 29th and 30th. Private contractors, CalTrans and CHP will be on scene for this clean-up. All transients on scene today were detained, identified, and issued citations. I informed and offered services to all but they were not received. I will update if there are any changes in dates. Thank you all for your patience.
